## NOTICE OF ALLOWANCE

### *Examiner's Amendment*

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. William Schrot on June 25, 2004.

The application has been amended as follows:

#### IN THE SPECIFICATION:

- Page 2, line 1, insert the title -- **TEXTILE WEB, ESPECIALLY A TEXTILE-COVERED WEB FOR A PAPER-MAKING MACHINE** -- above the paragraph beginning "The invention relates to a textile web".
- Page 2, line 1, insert the title -- **BACKGROUND OF THE INVENTION** -- above the paragraph beginning "The invention relates to a textile web" and below the newly inserted title "TEXTILE WEB, ESPECIALLY A TEXTILE-COVERED WEB FOR A PAPER-MAKING MACHINE".
- Page 3, line 13, insert the title -- **SUMMARY OF INVENTION** -- above the paragraph beginning "The object of the present invention".
- Page 6, line 19, insert the title -- **BRIEF DESCRIPTION OF THE DRAWINGS** -- above the paragraph beginning "In the diagrams, the invention is".

- Page 7, line 17, insert the title -- **DETAILED DESCRIPTION OF THE PREFERRED EMBODIMENT** -- above the paragraph beginning "The device 1 illustrated".

IN THE CLAIMS:

CLAIM 24:

- Line 1, delete the number "23" after "with claim".
- Line 1, insert the number -- 1 -- after the phrase "with claim".

*Reasons for Allowance*

2. The following is an examiner's statement of reasons for allowance: the invention as claimed, namely a papermakers fabric with several web sections that extend parallel to one another in a lengthwise direction that are aligned adjacent to one another with their lateral edges being attached to one another via fasteners selected from the group consisting of a sewn seam and adhesive tape, characterized in that the adjacent lateral edges have alternating projections and recesses extending in a transverse direction to the textile web about 50cm or less, and the web sections being interlocked with one another via these projections and recesses and the fasteners connecting the projections to one another, is neither anticipated nor fairly suggested by the prior art of record.

Although the prior art of record demonstrates that it is known to provide a textile web with several web sections that extend parallel to one another, the prior art of record fails to teach web sections that are aligned adjacent to one another and attached to one another via the combination of a puzzle cut seam and a sewn seam or adhesive tape

Art Unit: 1772

wherein the projections on the web sections extend at a distance of 50cm or less. The closest prior art of record with regards to the puzzle cut feature are the teachings of Schleuter, Jr. et al. and Thornton et al. With regards to Schleuter, Jr. et al., the reference teaches that the seam formed according to the invention is one of enhanced strength, flexibility, and mechanical life which is held together solely by the geometric relationship between the ends of the belt material, which are fastened together by a puzzle cut (Col. 4, lines 1-5).” Therefore, Schleuter, Jr. et al. teach away from a combination of a puzzle cut seam and an adhesive or sewn seam fastener. Schleuter, Jr. et al. also fail to teach the distance at which the puzzle cut seam projects from the web section. With regards to Thornton et al., the reference teaches the use of a puzzle cut seam in combination with adhesive, but the adhesive is exposed between the seams such that the adhesive can be melted and pressed into the seam so that it can be flattened and mechanically uniform with the belt (Col. 5, lines 40-62). Thus, Thornton et al. only teach an adhesive and not an adhesive tape and in fact teach away from the use of an adhesive tape since a tape backing would not be able to be pressed and flattened into the seam. Furthermore, Thornton et al. fail to suggest a puzzle cut seam that extends at a distance of 50cm or less in a transverse direction to the web. Furthermore, Thornton et al.’s puzzle cut seam may very well be impossible to duplicate in a textile material since it is extremely intricate and based on the use of a polymeric substrate rather than a textile web.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
